2. This functionality allows two Participants to register bespoke trades on venue that are either:
 - a) "From Scratch", independently proposed and agreed directly by both Participants, usually over the phone, and then registered as a Trade on the Market; or
 - b) "From Best", as a bilateral negotiation tool allowing the sender to request a customisation (size and/or Price) of the best quote present in the order book. ANNEX A: Market Making commitments on behalf of the AFT (or the Secretariat of the SVT Market Committee when the Participant is not an SVT)

A-1 Allocation of Financial Instruments to Market Makers

The Secretariat of the SVT Market Committee allocates Financial Instruments issued by the AFT to the Market Makers for the following Instrument Class: nominal bonds, inflation linked bonds and FTBs. The Secretariat of the SVT Market Committee notifies MTS France of the Market Making Commitments of its Market Makers and may modify these obligations not more than once a calendar month, except in the case of FTBs whose allocation may be modified as often as necessary in a calendar month.

For Instrument Class Strips, the relevant Market Maker Participants select the Financial Instrument (s) on which they wish to implement a Market Making Strategy according to the provisions in Article A-8 of this Annex.

A-2 Market Making Commitments

Market Makers are committed to display, during each trading day over a period of 5 hours, Double-Sided Quotes on the Financial Instruments that have been allocated, according to the provisions in Articles A-6, A-7 and when relevant, A-8 of this Annex.

A minimum lot size and a maximum quoting Spread is required from each Market Maker.

Any event affecting Market Making Commitments must be reported immediately by the Participant concerned to MTS France and the Secretariat of the Market Committee SVT. If this event results from exceptional external facts which are beyond the external control of the Participant, it will be reflected in the performance monitoring, provided it has been reported prior to the closing day of the Market.

A-3 Control of Performance

Each Market Maker undertakes to quote a certain number of Financial Instrument for a given period (Quotation Time), with a minimum size (Lot) and a maximum Spread for each Financial Instrument, as set out in Articles A-6, A-7, and when relevant, A-8 of this Annex.

Three (3) performance indicators have been established:

- Nominal Segment,
- Inflation Segment,
- FTB Segment.

When relevant, a fourth performance indicator is established for the Strips segment.

For each Segment, the performance is measured as follows:

- for each Financial Instrument, MTS France registers the time during which all the requirements are met (size and Spread). The performance on the Financial Instrument depends on the quotient of this duration over the target duration in accordance with the modalities defined in this Annex A and is equal to 100% if this quotient is superior or equal to 100%, 0% otherwise;
- the daily global performance of a Market Maker is the arithmetic average of its performances for each Financial Instrument.

A-4 Communication of performances

Participants receive from MTS France a daily report related to their quoting performance for the previous Trading Day.

This report includes, for each allocated Financial Instrument, the time effectively quoted, the average spread, the average bid/ask size, the quoting parameters under normal conditions, the daily global performance, and the average monthly performance.

For each Segment, it also indicates the daily global performance and the global monthly performance.

Except for the Strips segment, MTS France communicates to the Secretariat of the Market Committee, not later than the second (2nd) business day of a given month, the monthly performances related to the securities assigned to Market Makers.

A-5 Non-compliance with Market Making Obligations

A shortfall may be observed based on the monthly global report.

A shortfall occurs if the average monthly percentage is below eighty (80) % on at least one of the four (4) Segments: Nominal, Inflation, FTB, or, when relevant Strips.

A-6 FTBs

A-6.1 Classifications

FTBs admitted to the Market are split into three (3) maturity buckets:

- Bucket 0 to 3 months maturity;
- Bucket 3 to 6 months maturity;
- Bucket 6 to 12 months maturity.

A-6.2 Market Making Commitments, lot size and quoting requirements

Market Making Commitments communicated by the Secretariat of the Market Committee are effective on the first Working Day following auctions and are set out as follows:

- Minimum lot size (trading lot): 10 million euros, Double Sided Quotes shall be deemed of comparable size, meaning that their sizes do not diverge by more than fifty (50) % from each other;
- Maximum spread (in yield terms) express in basis points (bp);
- Minimum duration of quotation: 5 hours each day.

The quoting parameters are presented in the tables below (sizes in € millions, spreads in basis points (bp)).

	FTB			
	Benchmark		Liquid	
Maturity	Spread (bp)	Size (Mln €)	Spread (bp)	Size (Mln €)
3 months	3	10	Twice the average of the seven (7) best bid-offers Spreads Recorded amongst the Participants	10
6 months				
12 months				

Each Market Maker is obliged to insert Double-sided quotes on six (6) lines of FTBs: the last two (2) issued on the three (3) months, on the six (6) months and on the one (1) year maturity buckets (so one (1) benchmark and one (1) liquid for each of the maturity bucket); FTBs are allocated and renewed according to the FTB issuance and tap calendar, and according to the procedure outlined here-below. For each maturity, the FTB benchmark corresponds to the last issued bond.

In order for the quotation of a FTB to be valid:

- The duration of the quotation compliant with the criteria of minimum size and comparable size has to exceed five (5) hours
- The average bid-offer based on the best five (5) hours of quotation compliant with the criteria of minimum size and comparable size has to be inferior to the Spreads as defined in tables above.

MTS France registers the time during which all the requirements are met (size and spread). If the quotation is valid, the performance will be one hundred (100) %, otherwise, it will be zero (0) %.

Mechanism:

1. On a daily basis, MTS France sends to the Secretariat of the Market Committee SVT the average bid-offer Spread on the best five (5) hours of quotations compliant with the criteria of minimum and comparable size for each liquid FTB and each Participant.
2. The Secretariat of the Market Committee SVT compiles the data of every platform and calculates the average of the best seven (7) bid-offer Spreads Recorded amongst the Participant for every liquid FTB.
3. The following Trading Day, the Secretariat of the SVT Market Committee forwards the average bid-offer Spread to the Participants and to the platforms.

A-6.3 Renewal of Market Making Commitments

In keeping with the issuance and tap calendar, Market-Making Commitments on FTBs are redistributed without notice as follows: the newly issued FTB must be quoted from the day following its issuance. It ceases to be quoted on the day of issuance of a new FTB, replacing the existing one.

A-7 OATs and other variable rate Financial Instruments**A-7.1 Classifications**

OAT and other variable rate Financial Instruments are admitted to the Market and are split into the following categories and maturity buckets.

Categories

OAT and other variable rate Financial Instruments are admitted to the Market and are split into the following four categories:

- « Benchmark » Financial Instruments: these are reference Financial Instruments (last issued) with benchmark status of 2, 5, 10, 15, 30 and 50-year maturities;
- « Liquid » Financial Instruments: are those which are the most liquid Financial Instruments, but do not fall into the “benchmark” category;
- « Regular » Financial Instruments: are Financial Instruments which are regularly traded, but are considered less liquid;
- “Variable” rate Financial Instruments: are variable rate Financial Instruments.

Maturity buckets

Each category of OAT and other variable rate Financial Instruments admitted to the Market, is split into the following maturity buckets:

- Maturity bucket A: 1 to 3,5 years;
- Maturity bucket B: 3,5 to 6,5 years;
- Maturity bucket C: 6,5 to 11,5 years;
- Maturity bucket D: 11,5 to 17 years;
- Maturity bucket E: 17 to 35 years;
- Maturity bucket F: above 35 years.

A-7.2 Market Making Commitments, lot size and quoting requirements

Market Making Commitments are set out as follows, according to three parameters:

- Minimum lot size (trading lot), Double Sided Quotes shall be deemed of comparable size, meaning that their sizes do not diverge by more than fifty (50) % from each other;
- Maximum spread (in price terms in cents (cts));
- Quotation time: 5 hours a day.

The following table indicate the market parameters for Financial Instruments with a maturity of more than one (1) year.

The Secretariat of the Market Committee SVT informs MTS France when a new benchmark bond is issued by AFT. This bond shall be quoted by all Market Makers from the day following its issuance. The next month it replaces the Benchmark of the same maturity and the previous benchmark becomes "Liquid".

The quoting parameters are presented in the tables below (sizes in € millions, spreads in € cents (cts)).

Category	Maturity		OAT		Inflation linked		TEC	
			Spread (cts)	Size	Spread (cts)	Size	Spread (cts)	Size
Benchmark	A	1 to 3,5 years	4	10	25	10	25	5
	B	3,5 to 6,5 years	4	10	25	10	25	5
	C	6,5 to 11,5 years	5	10	25	5	25	5
	D	11,5 to 17 years	10	5	40	5	25	5
	E	17 to 35 years	20	5	50	2.5	25	5
	F	> 35 years	30	5				
Liquid	A	1 to 3,5 years	4	5				
	B	3,5 to 6,5 years	5	5				
	C	6,5 to 11,5 years	7	5				
	D	11,5 to 17 years	12	5				
	E	17 to 35 years	25	5				
	F	> 35 years	30	5				

On these bases, every Market Maker has an obligation to display Double-sided quotes on each of the government bonds from the following 2 Segments: the nominal Segment (OAT) and the indexed Segment (OATi/OATei).

In order for the quotation of a bond to be valid:

- The duration of the quotation compliant with the criteria of minimum size and comparable size has to exceed five (5) hours
- The average bid-offer Spread based on the best five (5) hours of quotation compliant with the criteria of minimum size and comparable size has to:
 - be inferior to twice the average of the seven (7) best bid-offers Spreads Recorded amongst the Participants;
 - or be inferior to the Spreads as defined in table above.

MTS France registers the time during which all the requirements are met (size and spread). If the quotation is valid, the performance will be one hundred (100) %, otherwise, it will be zero (0) %.

Mechanism:

1. On a daily basis, MTS France sends to the Secretariat of the Market Committee SVT the average bid-offer Spread on the best five (5) hours of quotations compliant with the criteria of minimum size and comparable size for each government bond and each Participant.
2. The Secretariat of the Market Committee SVT compiles the data of every platform and calculates the average of the best seven (7) bid-offer Spreads Recorded amongst the Participant for every bond.
3. The following Trading Day, the Secretariat of the SVT Market Committee forwards the average bid-offer Spread to the Participants and to the platforms.

Each month, MTS France will identify the Financial Instruments on which a Participant has performed a Market Making Strategy within the relevant Instrument Class.

In order for the quotation of a Strip to be valid:

- b) The average bid-offer Spread based on the best five (5) hours of quotation compliant with the criteria of minimum size and comparable size has to be inferior or equal to the Spreads as defined in tables above.

MTS France registers the time during which all the requirements are met (size and spread). If the quotation is valid, the performance will be one hundred (100) %, otherwise, it will be zero (0) %.

ANNEX B: Trading Days

A Market Maker may however be relieved of its Market Making Commitments as provided for in Article 4.10.5, on days which are officially recognized as bank holidays in **France or in the United Kingdom**. The Market Maker will not be considered as having breached its Market Making Commitments on these days.

For example, a Market Maker which trading operations are based in the United Kingdom will be relieved of its Market Making Commitments on United Kingdom Public Holidays, however it will be expected to fulfil its Market Making Commitments on French holidays, except on TARGET holidays.

Each Market Maker shall inform MTS France and the Secretariat of the SVT Market Committee of its choice regarding its country of reference (France or the UK) for the purposes of these provisions.
